KSM Superclean

Ideally suited for low volume production and prototyping, ksmsuperclean Hand Rollers are the key to efficient micro contamination removal. Increased yields and a reduction of costly re-work are the benefits of using ksmsuperclean products. Recent tests against competitive products at a large PCB manufacturer in Germany have revealed that ksmsuperclean rollers last 4 times longer and present a more efficient and cost-effective system. ksmsuperclean Hand Roller and Adhesive Pads offer a truly strong, simple and reliable solution.

Polyimide Laminate from Nelco

Lamar are pleased to announce a further addition to their range of high temperature products manufactured by Nelco.

N7000-2V0 uses toughened polyimide resin chemistry to achieve a UL 94-V0 flammability rating. This toughened polyimide has a low Z-axis expansion and is ideal for high reliability multilayer designs.

N7000-2V0 is now manufactured in France. Check with Lamar for availability of Polyimide laminate and pre-preg

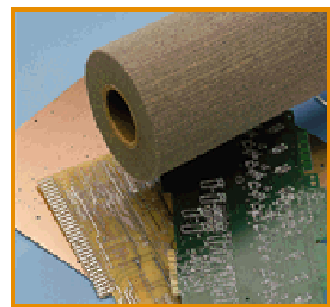

Improve your finish with Falkenrich brushes

Falkenrich and Lamar Your partners for surface finishing

Is your surface preparation causing low yields in in photomech? Many of the problems seen in photomech can be traced to an incorrectly set up brushing operation.

Lamar can offer an audit service for your brushing operations, checks include brush type, brush set-up, surface finish and machine condition.

Ask Lamar for a surface prep audit now.

Artwork Protection Film From Lamar

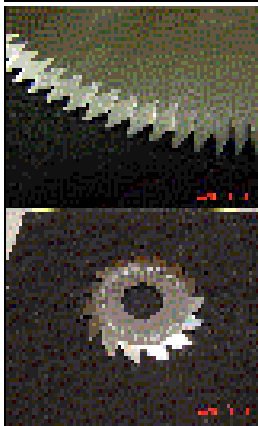

Protect your original artworks with Technilith APF manufactured by Intelicoat.

APF protects artwork from scratches and chemical damage from LPI inks and chemical solutions without interfering with light transmission.

Technilith has a very low haze level for more accurate reproducibility.

APF consists of a PET film of either 6 μ or 3.5 μ coated with a 1 μ slipcoat which has a high coefficient of friction and is anti-static this prevents mask and airborne contaminants from sticking to the film and makes it easy to clean.

Leuco Scoring Blades

Lamar have a range of Leuco diamond or tungsten carbide tipped scoring blades suitable for all scoring machines.

Leuco scoring cutters have polished cutting edges which gives increased edge life. Solid carbide bodies mean less vibration and better cutting quality.

CEM1 Copper Clad Laminate

Lamar have stocks of CEM1 laminate manufactured by Chang Chun Plastics Co Ltd.

The laminate grade is CCP-508 and it is approved to UL 94 V-0. Chang Chun's UL file number is E108591.
