kmsuperclean
worldwide micro-contamination removal

Acknowledging surface contamination is the first step to achieving increased end of line yields.

Installing a KSM "Just In Time" surface cleaning system into your production line is the solution to reducing defects.

At Productronica KSM will be exhibiting value for money solutions in the field of micro contamination removal.

Visit us in Hall B3, Stand 128 to see and discuss our strong, simple and reliable solutions that will optimise your throughput.

HIGH TEMP RELEASE FILM

Are you bonding with polyimide or other pre-pregs which need high temperature?

Having trouble with release film forming a scum or splitting?

You need high temperature release film from Lamar

Lamar's High Temperature Release Film is a high performance film that will withstand temperatures up to 260°C and is suitable for bonding polyimide and other high temperature laminates.

HT Release film is inert and does not stick to press plates.

HT Release Film is available in rolls or panels and can be supplied tooled to your configuration.

DRY FILM FROM SKC

Lamar pleased to offer the Skyfine range dry film photoresist manufactured by SKC.

SKC, with Headquarters in Korea, are one of the largest producers of polyester film in the world.

The range of Skyfine photoresists give excellent resolution, are developed in 1% sodium carbonate and give minimal sludge in the developing solution.

Check out the Skyfine presentation at our web site:-

NEWSLETTER

LAMAR

WIN A CASE OF WINE

Following last years success, we are once again giving you the chance to win a case of wine. In the run up to Christmas until 9/12/2005 every order placed with Lamar will be entered into a weekly lucky draw.

Each week the winner will receive a case of 6 bottles of wine, 3 red and 3 white.

LAMINATES FOR LEAD-FREE PROCESSING

The RoHS directive comes into force in July 2006, this will ban the use of 6 substances, including lead, in electrical and electronic equipment sold in the EU from that date.

The restriction of lead will mean higher soldering temperatures are needed to form solder joints.

For information on what this will mean for the base laminate and what alternatives are available, check out the presentation "Laminates For Lead- Free Processing" on our web site:-

HP-Tec Routers

As a result of new manufacturing techniques HP-Tec routers are 100% controlled in the production process. This continuous optimisation has resulted in increased performance of all routers

Contact Lamar for more information HP-Tec drills and routers

SPECIAL OFFERS

We have a list of special offers on our web site. These will be updated weekly

Check the offers now at www.lamargroup.co.uk and don't forget to check on a regular basis and pick up a bargain
